Welcome to Day Two of the Conference

Kickoff: Day Two
Creating a productivity culture: it takes effort, but is it worth it? Aren’t we already good enough?
In a few decades, computer technologies have advanced so significantly that you can spend $200 to $300 today for a basic laptop computer that has performance standards that are almost infinitely better than the PCs and laptops available in 1994, which cost $3,000 to $5,000 (in 2016 dollars).

You can get computers today with thousands of times more memory, speed, performance and disk storage space than computers in the mid-1990s at a fraction of the price.

We Need Your Feedback!

To be more eco-friendly and convenient, our annual attendee feedback form is now online; please access it through the mobile app or watch for an email link.

Take 5 minutes to tell us what you thought!

You could win an Amazon gift card For your effort (one winner drawn).
# Day Two Breakout Sessions

## 4 Tracks to Choose From

<table>
<thead>
<tr>
<th>Time</th>
